

Decentralized Funding for Startups

CRYPTFUNDER is a decentralized funding source for startup ICOs enabling funding for the crypto community. It is a utility token that will fund pre-ICO startups and will employ expert analysts to identify the projects with the greatest potential market value based on the quality of their team and the real-life application and utility of their technology. CRYPTFUNDER will provide seed crypto-capital at a crucial phase in return for pre-ICO tokens at a discounted rate, guiding developing ICOs to success and developing a diverse portfolio of new and developing cryptocurrencies and providing value for all of our participants.

- May 2018 ● ICO Launch Starts: May 25, 9:00 pm UTC. Token sale Duration: 45 days
- July 2018 ● First startup ICO funding occurs. CF30 portfolio tokens fully purchased. Cold wallet security & hot wallets implemented.
- Sept 2018 ● CRYPTFUNDER CFND listed on first exchange. UI improvements front-end and back-end.
- Dec 2018 ● 25 ICO startups funded to date. Startup ICO tokens garnered: 2,500,000. Expected CFND price: \$25.00.
- June 2019 ● CRYPTFUNDER CF30 reaches \$80M in value.

Security

Cryptfunder security protocols will be of utmost importance not only pre-ICO but ongoing. We will self evaluate our security as well as perform 3rd party audits on a regular basis.

CF will stay on the cutting edge of anti-intrusion, anti-DDOS and anti-hacking technologies. Security for our applicants data as well as for our tokens and portfolio will be top priority and constantly re-adjusted with the changing climate of cryptocurrency

Funding

Our core mission is to fund disruptive and cutting edge technology startup ICO's via cryptocurrency in exchange for their tokens.

Cryptfunder will strive to fund the best of the best ICOs offering monumental value for all participants. We plan on a minimum of 3-5 fundings every month and increasing these levels as we refine the application and funding process. Our due diligence and ICO research, will enable CF to succeed massively.

Token Receive

Cryptfunder will negotiate for the highest amount of startup ICO tokens possible in exchange for hard crypto-funding given for the startup's seed capital.

We will initiate all security protocols and internal escrow procedures when receiving tokens and then secure these in cold wallets whenever possible. Our main focus then is to mainly hold for the long term thereby maximizing value and growth for our Cryptfunder token CFND.

Portfolio

The Cryptfunder 30 (CF30) token portfolio will consist of the best token picks from a mixture of high, mid and low cap tokens. Being a buy and hold portfolio primarily, the Cryptfunder 30 will only tend to increase in value in the long-term.

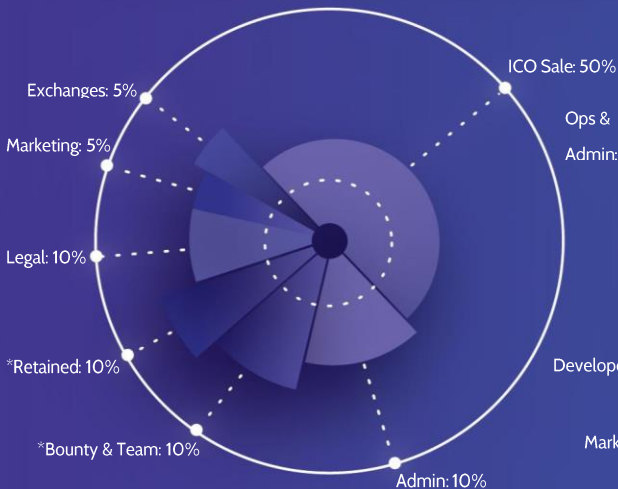

We will employ the professional investment managers and advisers whenever positioning and re-balancing. Security will be using cold storage methods as well as safe security boxes at established, public banking institutions.

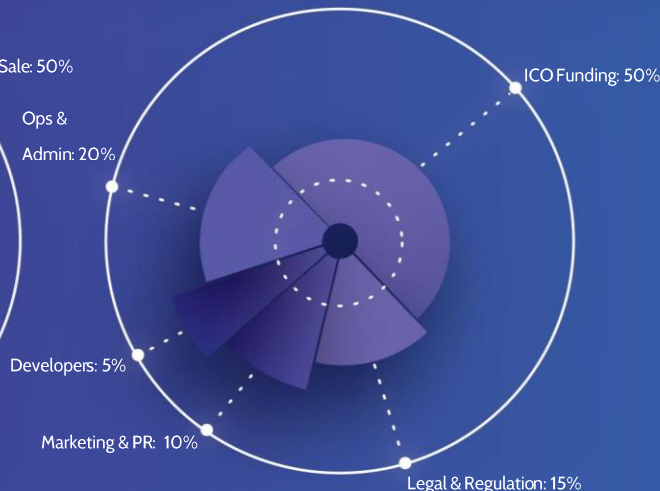

Token

- ▲ Total Token Supply: 40,000,000 CFND
- ▲ Total ICO Supply: 20,000,000 CFND
- ▲ Initial Token Value: 0.003 ETH/Token
- ▲ ICO Start Date: May 25th, 2018
- ▲ Hard Cap: 60,000 ETH
- ▲ Soft Cap: 3,000 ETH

Token Distribution

ICO Funds Allocation

Tokens are vested for a period of not less than 2 years.
